

## Senior Data Science Consultant (f/m/d)

We are currently seeking a full-time Senior Data Science Consultant.

You think in a data-driven way, take ownership and want to make a tangible impact on companies? Then join us in taking business models and products to the next level!

### Your tasks and responsibilities:

- You are part of a cross-functional team with a **focus on Data Science and Data Engineering**.
- You take an **active role** in client projects as well as internal initiatives, including project leadership responsibilities.
- **Presentations** and **pre-sales** activities: confident communication with a wide range of stakeholders.
- Development of **data-driven strategies** and translation of business questions into scalable use cases.
- Acting as a **key interface** between business units and IT in the machine learning and data science environment.
- Identification of **opportunities, project ideas** and **new services**.
- Active **trend monitoring**, knowledge sharing and creation of presentations and content (e.g. for clients, website, social media).

### What you bring to the table:

- A completed degree in **(Business) Informatics, Mathematics, Physics, Engineering**, or a comparable scientific discipline.
- **At least 5 years of professional experience** in the data science and machine learning domain.
- Proven **expertise (certifications and/or project experience)** in at least one of the following technologies: **Databricks, Snowflake, Google BigQuery, Microsoft Fabric**.
- Knowledge of modern **Cloud Architectures** (Azure, AWS, GCP), on-premise solutions, containerized environments, and Infrastructure as Code.

- Experience with **Big Data Ecosystems** (e.g. Apache Spark, Kafka), **NoSQL Technologies** and Cloud Services.
- **End-to-End experience** across data/ETL pipelines, ML models, and their integration and deployment into existing IT systems.
- Development of **ML Applications** and confident use of **Python and/or R, SQL**.
- Up-to-date know-how in **GenAI, RAG** and **Agentic AI**, along with a strong interest in building stable, production-ready client solutions.
- **Business-fluent English** and strong **presentation & facilitation skills**. German is considered a significant plus.
- **Willingness to travel** if projects require on-site work (for kicks-offs or status-meetings).

#### What to expect from us:

- A secure **permanent employment** contract.
- **Active involvement** in shaping our company's growth.
- Further **training opportunities**: SAP Learning Hub, online courses, etc.
- A **collaborative organizational culture** with minimal hierarchy and short decision-making cycles.
- **Independent work**: flexible working hours and home office.
- **Sense of community**: joint team events & team building
- Attractive **remuneration** with **bonus model**.
- **Equipment**: Freedom to choose your work tools (e.g., Apple or HP notebook, mobile phone of your choice) and our **NextLytics@Home Bonus** to help you set up your **home office workspace**.
- **Vacation days**: 30 days of vacation per year (Christmas Eve and New Year's Eve are days off).  
+ our **"NextHoliday"-Vacation Model** for further battery charging.

Send your application to Mirjam Bartsch at [hr@nextlytics.com](mailto:hr@nextlytics.com) or apply using our [online application form](#).

There is no need to send a cover letter if you don't want to.

We welcome applications regardless of gender, identity or personal background.

Don't have a resume handy but still interested? Just send an email to Mirjam ([hr@nextlytics.com](mailto:hr@nextlytics.com) or [mirjam.bartsch@nextlytics.com](mailto:mirjam.bartsch@nextlytics.com)) and arrange a meeting to get to know each other.
